OneStream Testcase Review Studio

User Guide & Form Navigation Manual

OneStream XF Ready

1. Overview & Purpose

The **Testcase Document Generator** is a specialized automation tool designed for OneStream development teams, reviewers, and business analysts. It converts ServiceNow tickets, daily activity notes, or developer logs into an officially formatted Word testcase review checklist (.docx) compliant with corporate governance requirements.

Website URL: `https://tc-document-generator.onrender.com`

2. Navigating the Interface

The interface is streamlined to collect minimal required metadata while allowing complete flexibility in your input description.

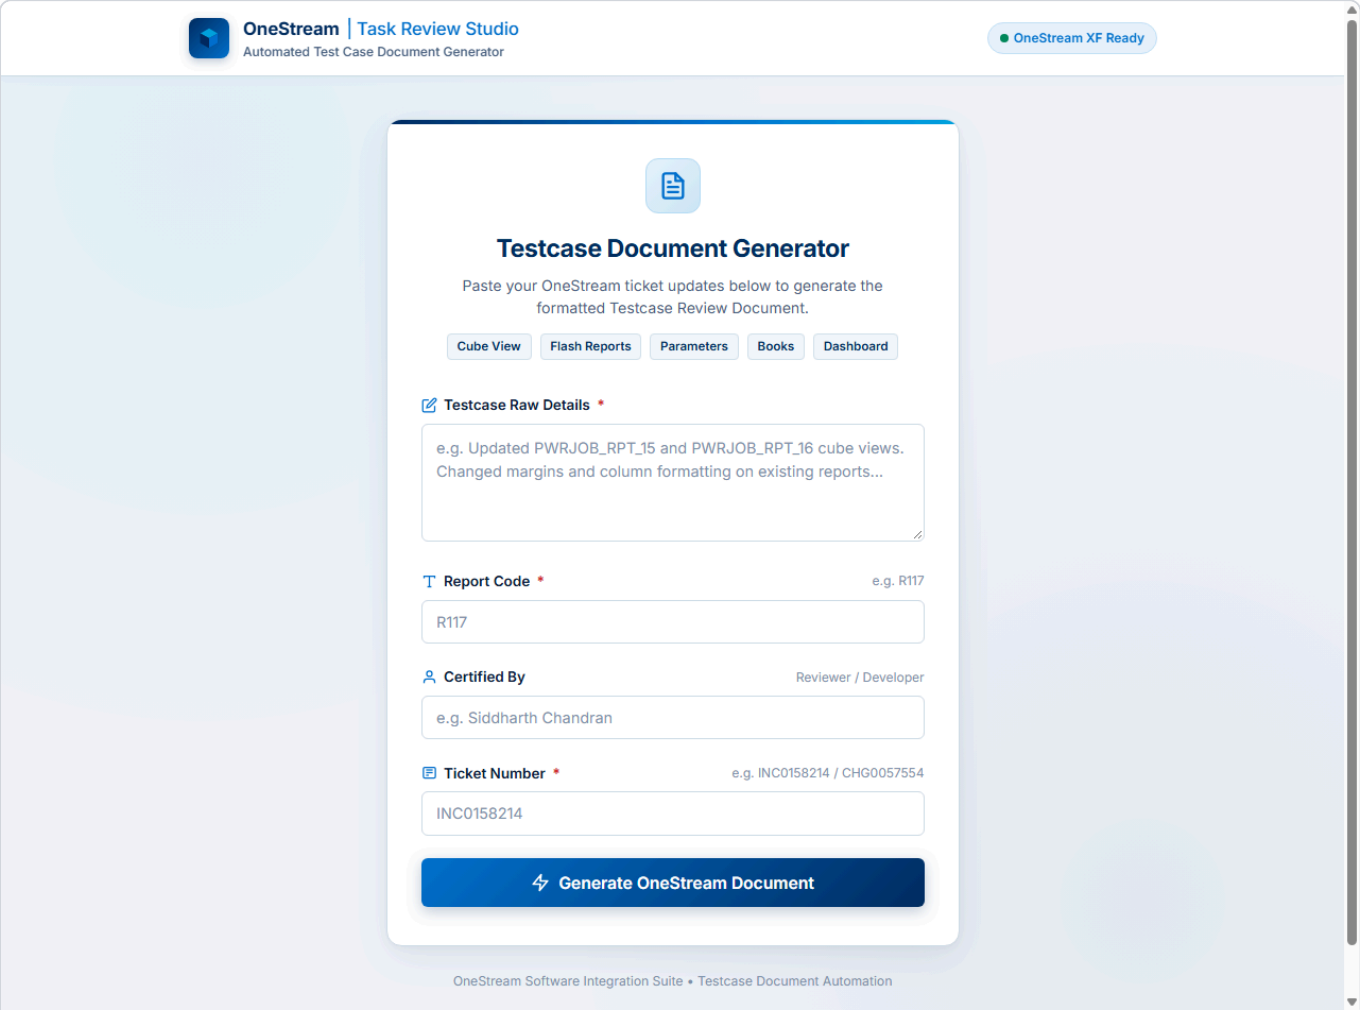

Figure 1: Application homepage showing required input fields.

Field Descriptions:

- **Testcase Raw Details (Required):** Paste the complete ServiceNow change/incident description, developer notes, or prompt detailing modified OneStream artifacts and workflow changes. Minimum 10 characters.
- **Report Code (Required):** Enter the primary report or artifact code (e.g. `R117`, `PWRJOB_RPT_15`, or `RPT_FORECAST`).
- **Certified By (Required):** Developer name (e.g. Siddharth Chandran). Mandatory – stamped on the certification block of the generated document.
- **Ticket Number (Required):** ServiceNow tracking ticket (e.g. `CHG0058275`, `INC0158214`, or `RITM0098421`).
